PROFESSIONAL SUMMARY

Salesforce Administrator and Full Stack Developer with experience in Salesforce configuration, automation, and system integrations. Skilled in building scalable solutions using Salesforce Flows, REST APIs, and cloud-based services. Experienced in integrating Salesforce with external platforms such as JIRA and Ironclad, and developing backend automation using AWS and Python. Strong background in improving workflows, system efficiency, and business processes.

WORK EXPERIENCE

Fullstack Developer / Platform Delivery Expert

Globe Telecom

📅 Oct 2024 – Present

- Administer Salesforce environments including user setup, roles, profiles, permission sets, and security controls.
- Configure and optimize Salesforce Flows, Process Builder, and validation rules to automate business processes.
- Assist in the development and customization of features using Apex and Lightning Web Components (LWC).
- Designed and developed frontend interfaces for internal web applications and form advertisements utilizing ReactJS, HTML, and CSS.
- Integrate Salesforce and Ironclad (CLM) with external systems such as JIRA using REST APIs and webhooks.
- Design and implement JIRA automation rules to streamline workflows and ticket management.
- Develop and maintain AWS-based API integrations for backend automation and data synchronization.
- Perform data management tasks including data imports, cleansing, and reporting using Salesforce tools.
- Collaborate with stakeholders to gather requirements and deliver scalable CRM and integration solutions.

Junior Full Stack Developer

Asticom Technology Inc.

📅 Oct 2021 – Oct 2024

- Developed web applications using ReactJS (frontend) and Python (backend APIs with authentication and integrations).
- Built and consumed RESTful APIs for system communication and integration.
- Reduced server load and costs by optimizing search functionality and backend performance.
- Created landing pages and forms using Pardot (Salesforce Marketing Cloud Account Engagement).
- Automated processes using Python scripts and backend services.

Web Developer Intern

Cortex Technologies Corporation

📅 Jan 2020 – Mar 2020

- Developed ReactJS components for web applications.
- Gained experience working with IoT-related systems.
